

The logo for Carbon-Expert features a stylized green 'C' on the left, followed by the text 'carbon-expert' in a green, lowercase, sans-serif font. Below the text is the tagline 'WHAT MAKES US DIFFERENT?' in a smaller, all-caps, green font. The background consists of soft, wavy green and white gradients, with a few abstract shapes: a grey one in the top right and a yellow one in the middle right.

WHAT MAKES US DIFFERENT?

THE LEADING CARBON TRADING COMPANY

# Our Experience

Carbon credit investments are spurred by a diverse range of motivations. Whether it concerns a large corporation committed to offset emissions, or individuals seeking to counteract the adverse affects that our businesses and lifestyles have on our environment, Carbon-expert can recommend a carbon credit investment that suits your requirements. In addition, this globally recognised carbon exchange system provides the added benefit of offering short and longterm profits for the investor.

It is essential that before a Carbon Credit investment is made, all aspects of the process are considered and understood – including both the voluntary and the compliance markets. The Carbon-expert team has a wealth of unique experience that includes all aspects of the exchange from the grass-roots of international projects through to the financial allocations and management of clients' carbon credit portfolios. It is this experience that makes our team the experts when it comes to Carbon Credit investments.

## Our Expertise

Carbon-expert is a leading international broker of carbon credits because it has the expertise to ensure that investments suit the specific requirements of the individual. This bespoke service is provided by a team of individuals collectively educated to provide a conclusive range of expertise in the Carbon exchange protocol, the global financial markets, emerging markets blue-chip companies and environmental projects. Our team of professionals have been specifically selected due to their unique knowledge and experience, providing a service that you can trust for short, long and medium-term investments.

carbon-expert

## 3. Our Projects

Today, international governments and governing authorities acknowledge that the way that we live produces carbon emissions. Therefore, international projects that have a proven ability to reduce carbon emissions have been recognized by authorities such as the Kyoto protocol and provided with an income stream in the form of carbon credits.

Carbon-expert has hand-picked specific green developments that aid the future health of our world and advises clients on the best investments to suit their requirements.

Currently Carbon-expert is involved in creating alternative resources in India, Brazil and China with many other internationally beneficial projects in the pipeline for the emerging BRIC countries.

Carbon-expert specialises in verified carbon credits for the voluntary market.

Our

## Hands-on approach

The Carbon Credit market is now reported to be worth approximately US\$188 billion. This is one of the only markets that continues to grow in value, despite international downturns, and so we believe that it is essential to have a thorough understanding of all aspects of the exchange.

The team of individuals that makes up the Carbon-expert team have personally invested in the Carbon Credit market and been very successful. But equally, they have also worked within the projects that aid global sustainability.

The Carbon-expert team does not simply advise on the Carbon Credit protocol and the best way to profit from such investment, it also has a hands-on approach that is unique within the industry.

## Our International offices

Carbon trading is now a major global concern and so we manage our network of professionals from international offices in Spain (one of the biggest supporters of the Kyoto Protocol in Europe), Gibraltar and the UK. This network ensures that Carbon-expert comprises the best professional, multi-lingual brokers who work to provide the most successful Carbon Credit investments for our clients.

Invest in Carbon Credits and Invest in our future....
